

Encryption Security Solutions

encryptoSafe™ Best in Class Security Products

In today's world, businesses struggle to keep their information safe from criminals working to steal social security numbers, credit card numbers, tax returns, etc. encryptoSafe™ is a file encryption product used to protect information on your computer, laptop and/or computer network. If your computer or laptop is stolen, your information cannot be compromised if you have protected your sensitive files with encryptoSafe™.

encryptoSafe's™ 256 bit encryption offers unbreakable security for all confidential information and sensitive files. With encryptoSafe™ you have the ability to encrypt any file of any size using virtually any email platform. Once the file/s are encrypted they can remain on your computer or can be emailed and decrypted by another encryptoSafe™ user.

encryptoSafe™ was designed to overcome employee resistance by making it extremely simple to encrypt and decrypt files.

Encrypt and Protect sensitive files in 3 easy steps:

1. Right click on the file and select encrypt or drag and drop the file to the encryptoSafe™ icon on your desktop.
2. Email encrypted file(s) to other registered encryptoSafe™ users.
3. Email receiver decrypts the file using a password by right clicking on the file or by using drag and drop.

encryptoSafe™ Highlights

- Secure, unbreakable 256 bit encryption
- Easy to use and requires minimal training (5 minute maximum)
- Low system overhead
- Cost effective & scalable to small, medium and large enterprises
- Supported by most email platforms
- Compatible with virtually any version of Microsoft Windows™
- Allows you to encrypt any file of any size
