

# SECURITY SYSTEMS FOR EVERY TECHNOLOGY NEED, WE HAVE THE ANSWER

## TOTAL COMPUTING SOLUTIONS

Helping more than 1,200 offices be more productive since 1998.

PCI will design and build an access control system to effectively control and monitor access to your home or office.

Recording options include DVR, tape systems or you can record directly to your computer. Off site backup options are also available.

Viewing options include remote camera viewing from your cell phone, laptop or any computer connected to the Internet.

Access to your home or office can be secured by using one of the following identification technologies: smart card and /or keychain, fingerprint scanner or palm biometric scanner.

These devices can be used to monitor and control access to specific areas within your home or office. They can also be used to securely log into a computer or to punch into a time clock.

Our high quality security options include:

### Camera Options:

- Analog video (CCTV grade coax and power wire)
- IP video (category 5e or 6 data wiring)
- Standard black and white
- Standard Color
- Low light and no light
- Fixed or variable focus
- Fixed or controllable field of view (Pan tilt zoom PTZ)
- Indoor
- Outdoor, heated, shielded
- Vandal resistant.

### Recording Options:

- TV or Computer based, DVR
- Offsite viewing and archiving

### Access Control Options:

- Smart Card
- Keychain
- Biometrics: fingerprint or palm
